

H.H. Baselios Geevarghese II

Baselios College, Kottayam was established in the hallowed name of H.H. Baselios Geevarghese II, the late lamented Catholicos of the East in 1964. As the reigning Catholicos of the Orthodox Church for almost three and a half decades (1929-64), His Holiness left his indelible mark in the socio-cultural domains of Kerala.

Sensing the need of the hour, His Holiness pioneered the dissemination of knowledge by founding several educational institutions in the then underdeveloped areas of Kerala.

His Holiness was born on 16th June 1874 into the illustrious Kallacheril family of Kurichy and began his ecclesiastical training at the early age of nine under the tutelage of the saintly Parumala Thirumeni. He was ordained Deacon in April 1892 and Bishop in September 1912. Metropolitan Mar Gregorios was elevated as the Catholicos of the East on 13th February 1929. In 1934, the Malankara Association elected him as the Malankara Metropolitan. During his tenure as the supreme head of the Orthodox Church of India, His Holiness exhibited extraordinary grace and vision until he was called to his heavenly abode on 3rd January 1964 at the age of 90.

Baselios College was founded soon after the demise of the Holy Father to perpetuate his vision and mission.

May his intercessory prayers be our refuge and fort

7. PROSPECTUS

Programmes Offered and Admission Norms

As a constituent college of Mahatma Gandhi University, Kottayam, Baselius College, Kottayam abides by all university regulations, other than those that affect its minority status and rights under Article 30(1) of the Constitution of India. The university follows the semester system in all its undergraduate and postgraduate programmes.

The College offers the following programmes of study as prescribed by the Mahatma Gandhi University, Kottayam.

A) UNDERGRADUATE PROGRAMMES **MGU-UGP with effect from 2024 Admission** **Aided Stream**

MGU-UGP Honours Programme

Starting this academic year (2024-25), Baselius College offers honours degree programmes affiliated with Mahatma Gandhi University, Kottayam, Kerala. The programme is known as the Mahatma Gandhi University Under Graduate Programme (Honours), abbreviated as MGU-UGP (Hons.). The new honours programme offers students unparalleled flexibility in tailoring their academic path, allowing them to choose subject combinations that align with their interests and career goals. Unlike existing courses, the revamped four-year programmes present a radically revised curriculum that emphasizes skill development and global relevance, preparing students for an increasingly interconnected world.

Outline of the Programme

The degree programme is designed in such a way that students can achieve a regular degree in three years with 133 credits, and if they complete 177 credits in the fourth year, they can obtain an honours degree. During their fourth year, students will have two academic options: Honours degree (with a project) and Honours with Research. Students who opt for the research stream in their fourth year will be awarded a UG Honours with Research degree, enabling them to directly pursue PhD programmes without a post graduate degree. Meanwhile, students with a four-year honours degree can complete their post-graduation in just one year. Additionally, two-year PG programmes will be available for those who exit the programme after three years.

Besides this, students have the opportunity to accelerate their studies and complete their programmes ahead of schedule by fulfilling the necessary course requirements and earning the required credits for degree completion. Through the 'N-1' option, students can condense a three-year programme into two-and-a-half years and a four-year honours programme into three-and-a-

half years, allowing for a faster pathway to graduation. Students who have taken a break from their studies will be allowed to re- enter the programme at a later semester (lateral entry). However, to qualify for a certificate, they must successfully complete 133 credits, as stipulated in the degree requirements. At the end of their fourth semester, students undertake an internship or apprenticeship, applying theoretical knowledge in a real-world setting and developing their skills and potential.

Structure of the MGU-UGP (Honours) Programme

The MGU-UGP curriculum structure in operation at Baselius College consists of three broad parts:

- a) Foundation Components, b) Discipline-Specific Pathway components (Major/Minor), and
- c) Discipline-Specific Capstone Components.

a) Foundation Components

The Foundation component comprises a set of General Foundation Courses and a set of Discipline-Specific Foundation Courses. The latter consists of major courses and minor courses taken during the first and second semesters of the programme. The major is in the programme to which the student is admitted, while the minor is chosen by the student. Students have the option to select two courses from the pool of courses available in the college as their minors in the first semester. These Discipline Specific Foundation Courses shall focus on foundational theories, concepts, perspectives, principles, methods, and critical thinking essential for taking up advanced level courses in the following years.

General Foundation Courses are grouped into four major categories: Ability Enhancement Courses (AEC), which include two English courses and two other languages selected from the available options of Malayalam, Hindi, Sanskrit, and Syriac; Skill Enhancement Courses (SEC), designed to instil 21st-century skills in students; Value Addition Courses (VAC), aimed at inculcating ethical and constitutional values in students; and Multi-Disciplinary Courses (MDC), intended to broaden students' intellectual experience by understanding the conceptual foundations of various branches of knowledge. Students cannot take the MDC in the same discipline that they have studied during their higher secondary studies.

At the end of the first semester, students have the option to switch their major to either of the Minors or any Multi-Disciplinary Course (MDC) they studied during the first year.

b) Discipline-Specific Pathway Components

The Discipline Specific Pathway Components comprise two key elements: Discipline Specific Core (DSC) courses and Discipline Specific Elective (DSE) courses, which encompass both Major and Minor courses in the second and

third years of study. This pathway provides students with the opportunity to delve deeper into a specific subject or discipline, developing expertise in their chosen area. Upon completing the foundation requirements and earning 68 credits through 17 major courses, students will be eligible to receive a degree from the affiliated university.

c) Discipline-Specific Capstone Components

The fourth year of the programme is dedicated to Discipline Specific Capstone Components, offering students two options: Honours with Research and Honours degree. Students who acquire minimum 75% in their graduation, up to 6th semester, are eligible for an admission to Honours with Research Programme. At this advanced level, courses are designed to enable students to demonstrate their cumulative knowledge in their main field of study through various means, including research projects, advanced thematic specializations, internships, vocational or professional training, or other types of work experience. Students who have completed their undergraduate degree with Honours (177 credit) can apply for lateral entry into the second year of a postgraduate program, thereby skipping the first year. Additionally, students who hold a Research Honours degree may be eligible for direct admission into a PhD programme, bypassing the need to complete a master's degree. The courses are structured to progressively increase in difficulty level across the years. The first two semesters, forming the Foundation level, comprise courses with a difficulty level of 100-199. The next two semesters, the Intermediate level, offer courses with a difficulty level of 200-299. The higher-level courses in the fifth and sixth semesters have a difficulty level of 300-399, while the Capstone level courses in the final two semesters have a difficulty level of 400-499. This structure ensures a gradual increase in academic challenge and complexity.

Credit Structure

The academic year will comprise 200 working days, divided into two semesters of 90 working days each. Each semester will have 18 weeks, with five working days per week, and a maximum of 15 weeks available for curriculum transactions. The credit system will be as follows: Major and minor courses: 4 credits each, General foundation courses: 3 credits each and Internship: 2 credits. One credit hour will be equivalent to one hour of lecture/tutorial or two hours of lab/practical/field work per week. Students can enroll in courses totaling a maximum of 30 credits per semester, with a minimum of 16 credits from Baselius College. The credits earned by students each semester and for each course will be recorded in the Academic Bank of Credits (ABC) account created for each student through MG University. Each student is assigned a unique student ID in ABC and can monitor their credit progress in ABC through the Digilocker app. To be eligible for a degree from the University, students must earn at least 50% of the total credits required for graduation from MG University.

**Course cum credit structure follows:**

Academic Monitoring and Student Support

A three-tiered monitoring system will be established to oversee the programme, consisting of:

1. A university-level committee headed by the Hon. Vice Chancellor
2. A college-level committee chaired by the Principal
3. A department-level committee led by the Head of the Department

These committees will work together to monitor the program's progress, ensure students receive mentoring support, and address any academic concerns. Additionally, an Academic Coordinator will be responsible for managing the MGU- UGP Honours programme at the college level. Each department will also have a Senior Faculty Advisor (SFA) and a Faculty Advisor (FA) for each class, providing guidance, clarification, and approval on academic matters.

Assessment and Evaluation

Only students who complete at least 75% of the prescribed classroom activities for a course are eligible to register for the end-semester evaluation. The assessment consists of two components: Continuous Comprehensive Assessment (CCA) worth 30% and End Semester Evaluation (ESE) worth 70%. Each course includes 20% Teacher Specific Content, designed by the course instructor, which is evaluated under CCA. This CCA comprises two sub-components: Formative Assessment (FA), an ongoing, in-process evaluation during a module or course and Summative Assessment (SA), a student evaluation at the end of a module or project or course. The end-semester practical examination is conducted and evaluated by the course faculty or coordinator. The duration and mode of examination shall vary across courses. Nevertheless, the typical examination duration is fixed between a minimum of 1 hour and a maximum of 2 hours. Project work in the eighth semester of honours courses will be assessed out of 200 marks, with 30% allocated to CCA and 70% to ESE. The same assessment pattern applies to internships at the end of the fourth semester

8. INTERNAL QUALITY ASSURANCE CELL (IQAC)

Quality Sustenance and Quality Enhancement are the two key words reverberating in most institutions of Higher Education in India (HEIs) today. For performance evaluation, assessment and accreditation and quality upgradation of institutions of higher education, the NAAC proposes that every accredited institution establish a “proactive and functional IQAC” in its system. Since quality enhancement is a continuous process, Internal Quality Assurance Cell (IQAC) as a post-accreditation quality sustenance measure shall initiate, plan and supervise various activities that are necessary to increase the quality of the education imparted in the college and shall play a key role in maintaining quality standards in teaching, learning and evaluation. The prime task of the IQAC is to develop a system for conscious, consistent and catalytic improvement in the overall performance of the institution. It channelizes all the efforts and measures of the institution towards promoting its holistic academic excellence.

The functions of IQAC are:

- to develop a system for conscious, consistent and catalytic action to improve the academic and administrative performance of the institution and disseminate information on various quality parameters of higher education
- to promote measures for institutional functioning towards quality enhancement through internalization of quality culture and institutionalization of best practices and to act as a nodal agency of the institution for coordinating quality-related activities
- facilitating the creation of a learner-centric environment conducive to quality education and faculty maturation to adopt the required knowledge and technology for participatory teaching and learning process
- arrangement for feedback response from students, parents and other stakeholders on quality-related institutional processes
- organization of inter and intra institutional workshops, seminars on quality related themes and promotion of quality circles
- documentation of various programmes/activities leading to quality improvement
- preparation of the Annual Quality Assurance Report (AQAR) as per guidelines and parameters of NAAC, to be submitted to NAAC
- development and maintenance of institutional database through MIS for the purpose of maintaining/enhancing the institutional quality

Members of IQAC are drawn from various categories of stakeholders.

11.1.2 POSTGRADUATE DEPARTMENT OF PHYSICS & CENTRE FOR RESEARCH

0481-2566162, physics@baselius.ac.in

Postgraduate Department of Physics and Centre for Research at Baselius College offers B.Sc. Physics from 1995, M.Sc. Physics from 1998, and Ph.D. from 2014 onwards. The department is renowned for its commitment to academic excellence and scientific inquiry, offering a robust platform for students to explore the fundamental principles of physics and their applications. The department boasts eight faculty members having research and teaching experience in diverse fields such as nano materials, luminescent materials, solar cell, conducting polymers, ceramics, thin films, photonics, astrophysics are actively engaged in advancing knowledge through their scholarly contributions. This ensures that students receive comprehensive exposure to both theoretical concepts and practical applications, preparing them for a wide array of career paths in academia, research, industry etc. The department has good laboratory facilities for hands-on learning and experimentation in general physics, electronics, and computer programming, which encourage critical thinking and problem-solving skills among students. The department has a reference library with nearly 2000 textbooks, which is sufficient enough for the students to prepare for the examinations.

Four-year B.Sc. Physics (Hons.) with Photonics specialization offered by the department provides great opportunity for students to explore the latest advances in science and technology. M.Sc. Physics with Materials Science specialisation is offered to ensure the students get ample opportunities to pursue their career in a variety of related fields. The department also offers multidisciplinary courses and skill development courses for interested students.

The department is a recognised Research Centre of MG University and the centre has six research guides. Research lab has good instrumentation facilities such as UV-Vis spectrophotometer, computer controlled dip-coating unit, laser induced thermal lens setup, self-phase modulation setup, high temperature furnace, oven, ultrasonic bath, high resolution electronic balance, distilled water unit, magnetic stirrers, centrifugal separation unit, and fume-hood for safe handling of chemicals. The department also emphasizes interdisciplinary research collaborations, encouraging faculty and students to engage in cross-disciplinary projects that address contemporary scientific challenges.

Beyond academics, the Department supports the learning community through seminars, workshops, and conferences that bring together experts, scholars, and students to exchange ideas to keep updated with the latest developments in physics. The department also serves as a platform for students to build connections and network within the academic and industrial community through various MoUs signed with them. The department utilizes the expertise of the faculty members as well as external resources for preparing the students for various competitive examinations such as NET, GATE, JAM, JEST etc.
