“Forecasting Covid-19 pandemic” he talked about various computational and mathematical models that can be utilised for forecasting the pandemic. He also emphasised on how basic principles of chemistry are applied to understand the operating mechanism of virus in our body and the action of soap against the virus.

On view of Covid- 19 pandemic the inauguration was done in a virtual manner using google platform. This was the first time we as a chemistry department came together in a virtual manner. The meeting began with a hymn by Aleen Antony (D3 Chemistry). Christina Mariam Mathew, teacher in-charge of the association welcomed gathering. Dr.Suma Bino Thomas presided over the function. Gayatri Jayaraj of D3 Chemistry captivated the audience with a melodious song. Mr. Vijay Prakash (Association Secretary) thanked the gathering.

Curies Series: Session I

Curies Series is the platform where all the members in the Department comes together periodically and have talks and discussions in different arenas of chemistry and science. Curie’s series generally includes a talk delivered either by a student or teacher in the topic of their interest. This gives an opportunity to students to improve their presentation and public speaking skills. This year in sight of covid -19 pandemic the series were held in a virtual manner.

The first session of Curies series were organised on 16/08/2020 at 3 pm via Google meet. Treesa Satheesh of D3 Chemistry delivered a talk on Bio-mimicry- Nature Inspired Innovations which was followed by a video presentation on Carbon Dating by Aiswarya T.S (D2 Chemistry).

Curies Series: Session II

The second session of Curies series was conducted on 28/09/2020 at 3pm in a virtual manner (Google meet). The meeting started with a prayer song by Aleen Antony of D3 Chemistry. The welcome speech was delivered by Ajish Kurian Daniel of M2 Chemistry. A presentation on the topic ‘Boron Chemistry and it’s applications in cancer treatment’ was well presented by Giya Merline Kuriakose of M2 Chemistry. The meeting ended with vote of thanks by Anju Joseph of M2 Chemistry.

Curies Series: Session III

The third session of Curies Series was held on October 27,2020 at 3pm through Google meet.

Aiswarya TS of D2 Chemistry welcomed the gathering. An interesting talk on Ocean Chemistry was delivered by Nevin Alexander of D2 Chemistry. He covered the topic in depth which was really interesting and informative. This was followed by a video

The screenshot shows a Google Meet window with a presentation slide. The slide title is "What causes ocean acidification?". The slide content includes a list of bullet points and a small image of coral reefs. The meeting interface shows "Nevin Alexander is presenting" and a list of participants on the right side.

Ocean Acidification

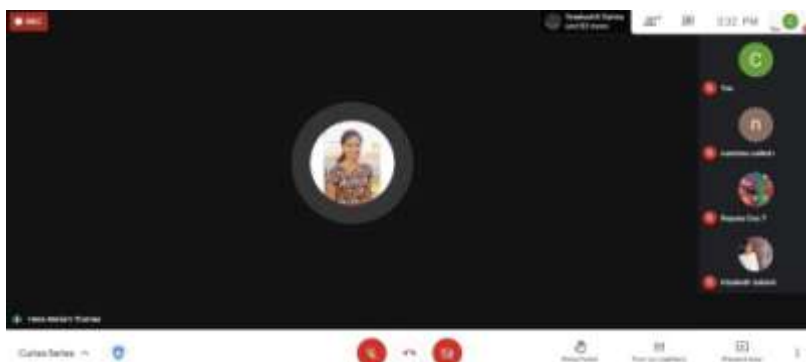

- The ocean's average pH is around 8.1, which is basic (or alkaline).
- But as the ocean continues to absorb more CO_2 , pH decreases and ocean becomes more acidic.
- **Ocean acidification** is the ongoing decrease in the pH caused by the uptake of carbon dioxide from the atmosphere.
- An estimated 30-40% of the CO_2 from human activity released into the atmosphere dissolves into oceans, rivers and lakes.
