REPORT OF VALUE EDUCATION (2017-18)

Value education is the education that is concerned with the transformation of an individual's personality. It is a process by which people give moral values to others. It helps us to understand what to do and why to do or what is valuable to you as a human being or good citizens. Value education aims to achieve two basic outcomes: Helping to better the values that guide their own daily lives and contributing to changes in values and held collectively by communities and personally by individual. It gives students about the knowledge of the world around us and changes it into something better. It develops in us a perspective of looking at life. It helps us build opinions and have points of view on things in life.

The college is the student's home away from their home. To ensure personal attention and learner analysis, we have introduced value oriented education in the college. It will help promote interpersonal relationship between the members of the Baselius family.

Committee Members

- 1. Fr. Dr. Thomson Robi
- 2. Elsa C. Maria Sebastian
