PYTHON FOR BEGINNERS

A Certificate Course in Python
Programming

FIRST SESSION ON
FEBRUARY 4TH 2023

Why do a course in Python Programming?

- To start programming in Python.
- To dive into coding and achieve a level of programming knowledge.
- To understand the basic concepts of software development technology.
- To develop problem solving, logical and creative skills.
- Great career opportunities.

Mathematics and programming are closely related.

Learning a programming language like Python is an added advantage for developing a good career.

Who should enroll?

- Anyone who wants to learn Python and modern programming techniques especially students.

The only preliminary requirement is a very basic knowledge in mathematics.

Topics to be covered

- Python Fundamentals – Tokens, Data types, Mutability and Immutability, Inputs
- Branching and Looping
- Complex data types – Strings, Lists, Tuples, Sets, Dictionaries
- Functions and Modules
- Objects and Classes

Syllabus

Module 1:

Python Fundamentals – Tokens, Data types, Mutability and Immutability, User Inputs.

Module 2:

Branching and Looping – if, else, elif, nested if, Jump statements, for loop, while loop.

Module 3:

Complex data types – Strings, Lists, Tuples, Sets, Dictionaries

Module 4:

Functions – Built-in and User-defined functions, Modules – Built-in and User-defined modules, Objects and Classes, OOPs concept, Inheritance

Module 5:

Turtle Package, Basic programs using Turtle package.
